Welcome to the Second Emergency Surgery Course. The first was held in Letterkenny Donegal in May 2012. This course builds on its success and is further enhanced by an international faculty who are leaders in Emergency Surgery.

World leading courses in Emergency Surgery are well established with ESTES in Europe and MOSES in Australia and New Zealand. Representatives of both courses and the Association Surgeons of Great Britain and Ireland are attending to embrace greater international collaboration in the teaching of Emergency Surgery.

Please enjoy the day (40 places available).

Course Goals

Understanding the natural history of key emergency surgery presentations with emphasis on decision making and operative tips and traps to optimise outcome. This coupled with a manual containing lectures and the latest literature abstracts will ensure your patients are getting optimal outcomes.

Donegal Clinical Research Academy would like to thank RCSI for their support and the sponsors without whom we could not share this course with you.
