Donegal**

**Course Co-ordinator:
Mr Michael Sugrue**

**80% of Students –Best educational day of
their 6 years in College-so don't miss it!**

**Great Refresher for Final Med Exams
Fantastic introduction for 3rd Meds**

Welcome to the 7th **Medical student** Emergency Abdominal Surgery Course (**sEASC**). This course is based on the award winning EACS for registrars/junior consultants. The first EASC course was held in Letterkenny, Donegal Ireland in May 2012 and the most recent in Canada, New Zealand, Portugal, Spain, Greece, Brazil and Sri Lanka. sEASC courses have now been held in Ireland, Brazil and Greece.

This new student course builds on that course's success and has been modified to meet the curriculum of medical students. It is an ideal preparation for those who wish to excel at their exams. The first course in 2015 was rated by final meds as the best educational event in their student's curriculum

World leading courses in Emergency Surgery are developing with ESTES in Europe and MOSES in Australia and New Zealand. None have been pitched for the need of the medical student. sEASC curriculum focuses on the acute abdomen, in a multidisciplinary shared learning approach. It will bring you a level of discussion you have not heard before and enhance your knowledge of presentations, symptoms, signs and management. This course is about the patient and common emergencies. It will help, not only with your exams but as a young doctor. It combines theory with practical cases. The cases are real, common and will take you to the patient in the emergency departments wards, ICU and OR. Over half of the course will involve discussion and explanation. All cases are illustrated with AV.

Course Goals

Understanding the natural history of key emergency abdominal surgery presentations. This coupled with a manual containing lectures and the latest literature references it will ensure you getting optimal exposure to both theory and practice. This course will take your knowledge to the next level.

Who should attend ?-

Medical students in clinical years – who want to be at the cutting edge! Ideal for Final Meds

Donegal Clinical Research Academy would like to thank Letterkenny Academy and NUI Galway for their support and the overarching support of the SEUBP funded Centre for Personalised Medicine, Clinical Decision Making and Patient Safety's, Cluster in Emergency Surgery, without whom we could not share this course with you. Thanks to our faculty who make all the difference.
