

Alicante, August 20<sup>th</sup> 2018.

Dear colleague:

As you probably know, there exist an initiative from the WSES of having a chapter of the WSES in all countries interested on it. Until now, Italy is the only country having such a particular chapter.

As representative delegate on the WSES from Spain, I have been proposed as coordinator of the Spanish chapter and this letter is to invite an propose you as a member of it. The aim of this WSES Spanish chapter is to promote training and education in the field of emergency and trauma surgery in Spain, promoting basic and clinical research in this context, diffusing protocols and guidelines developed by WSES. The national board will be created involving Spanish surgeons with daily practice in emergency and trauma surgery.

Hoping this challenge will be of your interest and I will be looking forward to have your participation. Please, confirm your interest, and send your contact data to [dcostacir@gmail.com](mailto:dcostacir@gmail.com)

Best regards,

***Dr. David Costa, PhD.***
