CT Scan in Abdominal Emergency Surgery

- Offers an easy-to-read companion for quick reference
- Includes numerous high-quality CT images with clear, concise descriptions
- Provides updated guidelines for the management of acute abdominal conditions

This book focuses on the diagnostic impact of CT scans in severe abdominal trauma and in non-traumatic acute abdomen, the two clinical entities that constitute the main reasons for referrals for this imaging technique from the intensive care unit. The concept behind it is that emergency surgeons and physicians not only need the clinical knowledge to manage the different pathological conditions, but that they must also have a full understanding of diagnostic imaging modalities. To this end, each chapter includes a description of a specific acute abdominal disorder. In addition to the clinical presentation and the diagnosis and management ...

Contents

Preface.- 1 Liver Trauma.- 2 Pelvic Trauma.- 3 Spleen Trauma.- 4 Duodeno Pancreatic Trauma.- 5 GI Trauma.- 6 GU Trauma.- 7 Acute cholecystitis.- 8 Acute appendicitis and Meckel diverticula.- 9 Acute diverticulitis.- 10 Complicated peptic ulcer.- 11 Small bowel ischemia.- 12 Acute colon cancer.- 13 ASBO Colon volvulus.- 14 Acute pancreatitis.- 15 AAA and visceral aneurysm.- 16 Pelvic inflammatory disease.

Compartment Syndrome

- Offers a comprehensive review of compartment syndrome
- Offering tip and tricks for dealing with compartment syndrome in everyday practice
- Intended for all professionals involved in the management of this complex condition

Comprehensively addressing the topic of the compartment syndrome, this book covers all aspects of this painful and complex condition, ranging from the history to the pathophysiology and treatment in the various body compartments affected by the syndrome, as well as the short- and long-term outcomes. With an up-to-date literature review and the innovative content written by international opinion leaders, it offers all involved in the management of such complicated patients a much-needed source of reference. Discussing compartment syndrome in everyday practice, this book is of interest to surgeons, practicing physicians, anesthesiologists and ...

Contents

1 History of the Compartment Syndrome.- 2 Definition and pathomechanism of the Intracranial Compartment Syndrome.- 3

Diagnosis and treatment of the Intracranial Compartment Syndrome.- 4 Definition, pathomechanism of the Thoracic Compartment Syndrome.- 5 Diagnosis and treatment of the Thoracic Compartment Syndrome.- 6 Definition, pathomechanism of the Abdominal Compartment Syndrome.- 7 Diagnosis and treatment of the Abdominal Compartment Syndrome.- 8 Definition, pathomechanism, diagnosis and therapy of the Extremities Compartment Syndrome.- 9 Polycompartment syndrome definition, pathomechanism, diagnosis and treatment.- 10 The relevance of ...

Open Abdomen

A Comprehensive Practical Manual

- Provides practical guidance on all aspects of management of the open abdomen in a wide

variety of settings

- Includes step-by-step descriptions of closure techniques, with informative figures
- Guidance in decision making

This book is the first available practical manual on the open abdomen. Practicing physicians, surgeons, anesthesiologists, nurses, and physiotherapists will find in it a ready source of information on all aspects of open abdomen management in a wide variety of settings. The coverage includes, for example, the open abdomen in trauma, intra-abdominal sepsis, and acute pancreatitis, step-by-step descriptions of different techniques with the aid of high-quality color figures, guidance on potential complications and their management, and features of management in different age groups. The book contents illustrate the most recent innovations and ...

Contents

Foreword.- Preface.- 1 Background historical notes.- 2 Basic research in open abdomen.- 3 Anatomy and physiology: the abdomen, the intra-abdominal pressure, hypertension, abdominal compartment syndrome, abdominal wall compliance, measuring systems.- 4 Pathophysiology of the open abdomen: benefits and problems. The metabolic cost and benefit.- 5 Indications for open abdomen.- 6 The open abdomen in trauma.- 7 The open abdomen in intra-abdominal sepsis.- 8 The open abdomen in acute pancreatitis.- 9 The open abdomen in vascular emergencies.- 10 The management of the open abdomen: the temporary closure systems (Not vacuum assisted systems, Vacuum ...

Abdominal Sepsis

A Multidisciplinary Approach

- Provides readers with an overview of the multidisciplinary approach needed in the management of patients with intra-abdominal sepsis
- Includes complete instructions for the appropriate treatment of sepsis
- Practical manual that equips readers to handle complex scenarios

This book examines in detail the topic of sepsis, with a focus on intra-abdominal sepsis. Particular attention is devoted to source control in the management of the infection, antimicrobial therapy and sepsis support, which represent the cornerstones of treating patients with this problem. The importance of a multidisciplinary approach is highlighted not only by the instructive and informative sections on the acute manifestations of appendicitis, cholecystitis, and cholangitis, perforations and diverticulitis, Clostridium difficile infection and the role of candida in abdominal sepsis, but also by an extensive discussion of issues including ...

Contents

1 Classifications and principles of treatment.- 2 Peritonitis and intra-peritoneal inflammatory mediators.- 3 Imaging diagnosis.- 4 High risk patients and prognostic factors.- 5 Acute appendicitis.- 6 Acute cholecystitis.- 7 Acute cholangitis.- 8 Pyogenic liver abscess.- 9 Gastroduodenal perforations.- 10 Small bowel perforations.- 11 Acute colonic diverticulitis.- 12 Post-operative peritonitis.- 13 Damage control surgery in managing abdominal sepsis.- 14 Ongoing peritonitis.- 15 Clostridium difficile infection.- 16 Complicated Intra-abdominal infections: Principles of Antimicrobial Therapy.- 17 Antimicrobial armamentarium.- 18 Antimicrobial ...

Endovascular Resuscitation and Trauma Management

Bleeding and Haemodynamic Control

- Describes the emerging clinical use of REBOA and other EVT techniques for resuscitation
- Written by a group of respected clinicians with extensive experience in bleeding management
- Presents an overview of new methods to stop bleeding using state of the art new techniques: from the pre-hospital to the post-operative period

This book focuses on endovascular methods for resuscitation and trauma management. Written by highly qualified and clinically active physicians from around the world, it shares information gathered over the past decade, providing a comprehensive database of clinical knowledge for a wide range of

practicing clinicians and researchers. Moreover, it describes basic methods for vascular access, methods for REBOA (Resuscitative Endovascular Balloon Occlusion of the Aorta), endo-grafts and embolization methods, as well as other, more advanced methods for endovascular and hybrid resuscitation (CPR REBOA, ECHMO etc.) from the pre-hospital to the ...

Contents

The Concept of EndoVascular resuscitation and Trauma Management - building the EVTm team.- Principles of Modern Trauma Resuscitation.- Endovascular Management of Cervical Vascular Trauma.- Endovascular Management of Thoracic and Abdominal Trauma.- Endovascular Surgery for Extremity Trauma.- Principles of REBOA.- Partial REBOA.- REBOA in Traumatic Brain Injuries.- REBOA - induced Ischemia-reperfusion Injury.- REBOA in Non-traumatic Cardiac Arrest.- Endovascular Balloon Occlusion in Obstetrical Hemorrhage.- Pre-hospital and Austere EVTm.- Endovascular Embolization in Trauma and Bleeding.- Management of the Unstable Patient during EVTm and ...

Emergency Surgical Management of Colorectal Cancer

- Presents decision-making trees and recommendations for best practice at the end of each chapter to facilitate the individual and quick decisions required in emergency situations
- Includes key-point boxes for each chapter to highlight the most important evidence to bear in mind and to aid the learning process
- Provides several clinical case studies with abundant imaging, endoscopic, and surgical iconography to allow a concrete reflection on frequent and less frequent situations

This volume provides an overview of the current evidence-based medical and surgical practice in emergency conditions in colorectal cancer patients. It offers a multidisciplinary perspective, taking into account the specific characteristics of colorectal cancer patients, the necessary pre-operative assessment, the endoscopic and radiological management, and the surgical treatments. Each chapter is supplemented with tables, figures, key-point boxes, schematic representations, and decision-making trees that serve as easy-to-use tools to apply in the different scenarios requiring acute care. Recommendations for best practice and the main ...

Contents

1. Colorectal Cancer Research: A State of the Art.- 2. Epidemiology of colorectal cancer: incidence, survival and risk factors.- 3. Socioeconomic impact of emergency therapies for colorectal cancer.- 4. Acute care and surgical risk assessment.- 5. Complicated Colorectal Cancer: Role of Imaging.- 6. Principles of colonoscopy for colorectal cancer emergency - Colonoscopy protocols in emergency settings.- 7. Management of colonoscopy complications.- 8. Emergencies related to primary colon cancer: multidisciplinary management of colon obstruction, perforation and bleeding due to colon cancer in absence of metastatic

disease.- 9. Emergencies ...

Emergency General Surgery in Geriatrics

- Addresses emergency general surgery in the elderly
- Presents a comprehensive, multidisciplinary approach to elderly patients undergoing emergency surgery
- Written by expert clinicians in the field and edited by prominent surgeons

There is a growing need for a book on emergency general surgery in the elderly, as adults age 65 and older are the fastest growing segment of the population worldwide, and their number is expected to double to 89 million between now and 2050. Based on these changing demographics, it is expected that there will be a concurrent rise

in the demand for a variety of surgical services, including vascular surgery (with a projected growth of 31%) and general surgery (with a projected growth of 18%), as well as in all sub-disciplines of surgery (thoracic, cardiac, oncology, hepatobiliary, transplant, plastic colorectal, orthopedic, gynecologic, ...

Contents

General consideration in elderly surgical patients.- 1 Introduction to emergency surgery geriatrics.- 2 Evaluation of geriatric surgical patients in emergency medicine department: surgeons view.- 3 Radiologic evaluation of elderly surgical patients.- 4 The effect of medical comorbidities of geriatric patients undergoing major surgeries.- 5 Practical approaches to perioperative management of anticoagulation.- 6 Anesthetic concerns in advanced age.- 7 Perioperative nutritional support in elderly.- 8 Antibiotic management in elderly.- 9 Post-operative rehabilitation.- 10 Specialized surgical care in elderly.- 10 Trauma care for the elderly.- ...

Infections in Surgery

Prevention and Management

- Presents an interdisciplinary approach
- Advises readers on how to classify and treat surgical site infections
- Reports on essential, evidence-based advances

Although most clinicians are aware of the problem of antimicrobial resistance, most also underestimate its significance in their own hospital. The incorrect and inappropriate use of antibiotics and other antimicrobials, as well as poor prevention and poor control of infections, are contributing to the development of such resistance. Appropriate use of antibiotics and compliance with infection prevention and control measures should be integral aspects of good clinical practice and standards of care. However, these activities are often inadequate among clinicians, and there is a considerable gap between the best evidence and actual clinical ...

Contents

1 Impact of hospital-acquired infections in Surgery.- 2 The burden of surgical site infections. Pathophysiology and risk factors. Pre-operative measures to prevent surgical site infections.- 3 Antibiotic prophylaxis. When, how and how long.- 4 Intra-operative measures to prevent surgical site infections.- 5 How to manage the surgical wound.- 6 How to classify and treat surgical site infections.- 7 Guidelines for the prevention of surgical site infections. How to implement them.- 8 The infected mesh. How to treat it.- 9 How to prevent and treat hospital/ventilator-acquired pneumonia.- 10 How to prevent and treat hospital/ventilator-acquired ...

Resources for Optimal Care of Emergency Surgery

- Updates readers involved in emergency surgery care with accessible descriptions of cases
- Reports a widespread international support tool
- Follows on the Donegal Summit on Emergency Care

Variability in care in emergency surgery is well known, particularly in abdominal surgery, and reducing it is fundamental to improving outcomes. It is therefore vital to identify the factors that are key to improving mortality and reducing complications in various surgical emergencies. Under the leadership of the World Society of Emergency Surgery, over 200 leading experts in emergency surgery, critical care and surgical infections established a template to help define and optimise emergency surgery, particularly that relating to the abdomen. This book refines this initial work, crystallising it into a meaningful resource for practising ...

Thoracic Surgery for the Acute Care Surgeon

- Is a "how-to manual" on thoracic emergencies for acute care surgeons.
- Focuses on the diagnosis and management (operative and non-operative) of thoracic injuries and disease
- Highlights limited-resource environments and pediatrics

This volume is a "how-to guide" to treating thoracic trauma and emergencies for acute care surgeons. It highlights the diagnosis and management of thoracic disease and injuries, and each chapter includes algorithms that lead readers through the process of identifying and treating many common and some uncommon thoracic pathologies. The international team of authors provides readers with a unique and diverse approach to the operative and non-operative challenges encountered by ACS surgeons. The large number of figures offers readers insights into what they can expect to see when caring for these patients. The editors understand that the ...

WSES Handbook of Mass Casualties Incidents Management

- Provides step-by-step guidance on all aspects of the management of mass casualty incidents
- Meets the needs of a wide range of medical and administrative personnel
- Offers numerous practical suggestions to aid decision making

This manual, written by world opinion leaders in the field, is designed to provide readily accessible, step-by-step guidance on all aspects of the management of mass casualty incidents. Readers will find a wealth of helpful practical suggestions as well as information on the latest relevant scientific advances and their implications. Globally, mass casualty incidents are becoming more frequent even in unexpected places. There is a need for a dependable manual suitable for use by all who must be prepared to face mass casualty incidents, including practicing physicians, surgeons, anesthesiologists, nurses, and administrators. This book meets ...

Contents

Preface.- Mass Casualty Incident - definitions and current reality.- Surge capacity and the concept of triage hospital.- Common wounding mechanisms and injury patterns.- EMS setup and field triage.- Emergency Department setup.- Clinical evaluation in MCI setting.- Administration, media, victim identification, family support, information center.- Nursing in MCI.- Auxiliary clinical diagnostics.- Conventional and Interventional radiology in MCI.- Operating Room (OR) setup, resource and demands.- Prioritization surgeries and damage control strategy.- Intensive Care Unit (ICU) - resources and demands.- The pediatric patient in MCI.- Tertiary ...

Emergency Medicine, Trauma and Disaster Management**From Prehospital to Hospital Care and Beyond**

- Offers an interdisciplinary and interprofessional approach
- Presents a horizontal approach covering all stages of the disaster management cycle
- Written by both prominent researchers and experienced practitioners

The number of natural and man-made disasters has risen dramatically over the last decade. Natural disasters, industrial accidents and terrorist attacks represent major incidents, often involving multiple casualties. In such cases, health professionals face multiple challenges because the type of medical care required differs from what is taught and provided in their everyday hospital duties. The aim of this book is to inform and prepare healthcare professionals for the challenges posed by major incidents, so that they can act effectively in medical

teams sent on humanitarian missions or into conflict zones. It offers a holistic and ...

Contents

Emergency Surgery for Low Resource Regions

- Provides a valuable resource for all surgeons in isolated or resource-limited areas
- Offers a range of treatment options that can be applied to each unique region
- Acknowledges variations in surgery around the globe

This book is aimed at surgeons faced with the immediate management of acute surgical problems in a variety of resource settings. The topics covered are common in both developed and developing countries as well as in tropical and non-tropical settings. The book offers an introduction to trauma, which includes primary, secondary and tertiary surveys, trauma resuscitation, and multidisciplinary care followed by a short section on acute burns management and a discussion of a range of specific surgical topics including various of acute abdomen, upper and lower gastrointestinal bleeding, perianal conditions, oncological issues that require acute ...

Contents

1 Changing face of acute surgery and increasing disparity between developed and developing countries.- 2 Minimum requirements for an acute surgical facility.- 3 Organisation of surgical systems.- 4 rational use of antibiotics.- 5 Pain management.- 6 The acute abdomen – an overall synopsis.- 7 Upper and lower gastrointestinal bleeding.- 8 Perianal conditions.- 9 Oncological issues that require acute intervention.- 10 Abdominal wall problems.- 11 Breast.- 12 Skin and soft tissue.- 13 Urological emergencies.- 14 Neck swellings.- 15 ENT emergencies.- 16 Trauma primary surveys.- 17 Trauma secondary surveys.- 18 Trauma tertiary surveys.- 19 trauma ...
